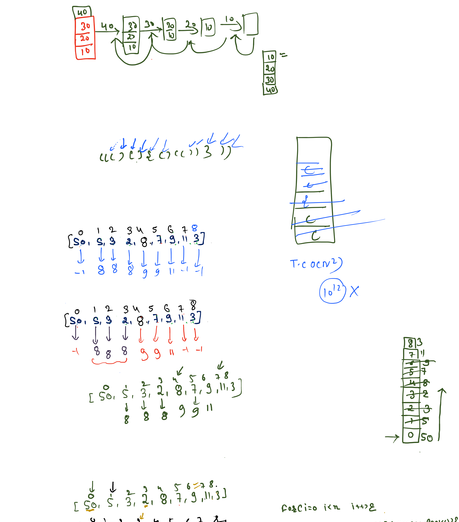
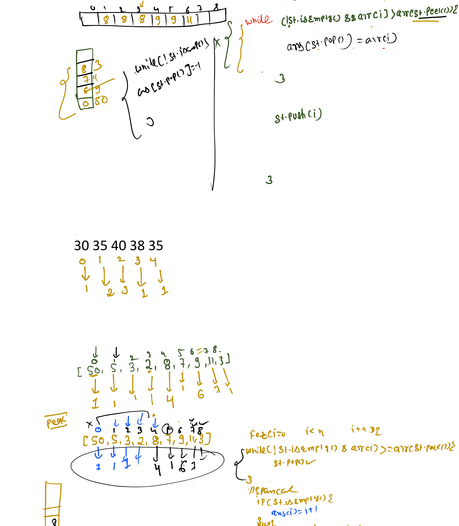
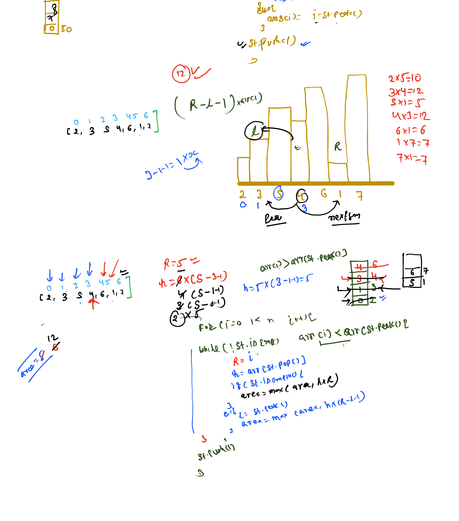
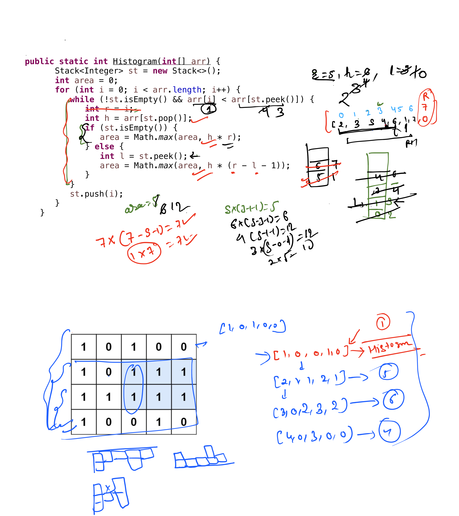
```
private static void Add_Last(Stack<Integer> st, int item) {
    // TODO Auto-generated method stub
    if (st.isEmpty()) {
        st.push(item);
        return;
    }
    int x = st.pop();
    Add_Last(st, item);
    st.push(x);
}
```









```
public static int Histogram(int[] arr) {
    Stack<Integer> st = new Stack<>();
    int area = 0;
    for (int i = 0; i < arr.length; i++) {
        while (!st.isEmpty() && arr[i] < arr[st.peek()]) {
            int r = i;
            int h = arr[st.pop()];
            if (st.isEmpty()) {
                area = Math.max(area, h * r);
            } else {
                int l = st.peek();
                area = Math.max(area, h * (r - l - 1));
            }
        }
        st.push(i);
    }
}
```
