Who is

class Node {
char ch;
HashMap<char, Node> child;
boolean isTerminal;

```
public void insert(String word) {  
  
}
```

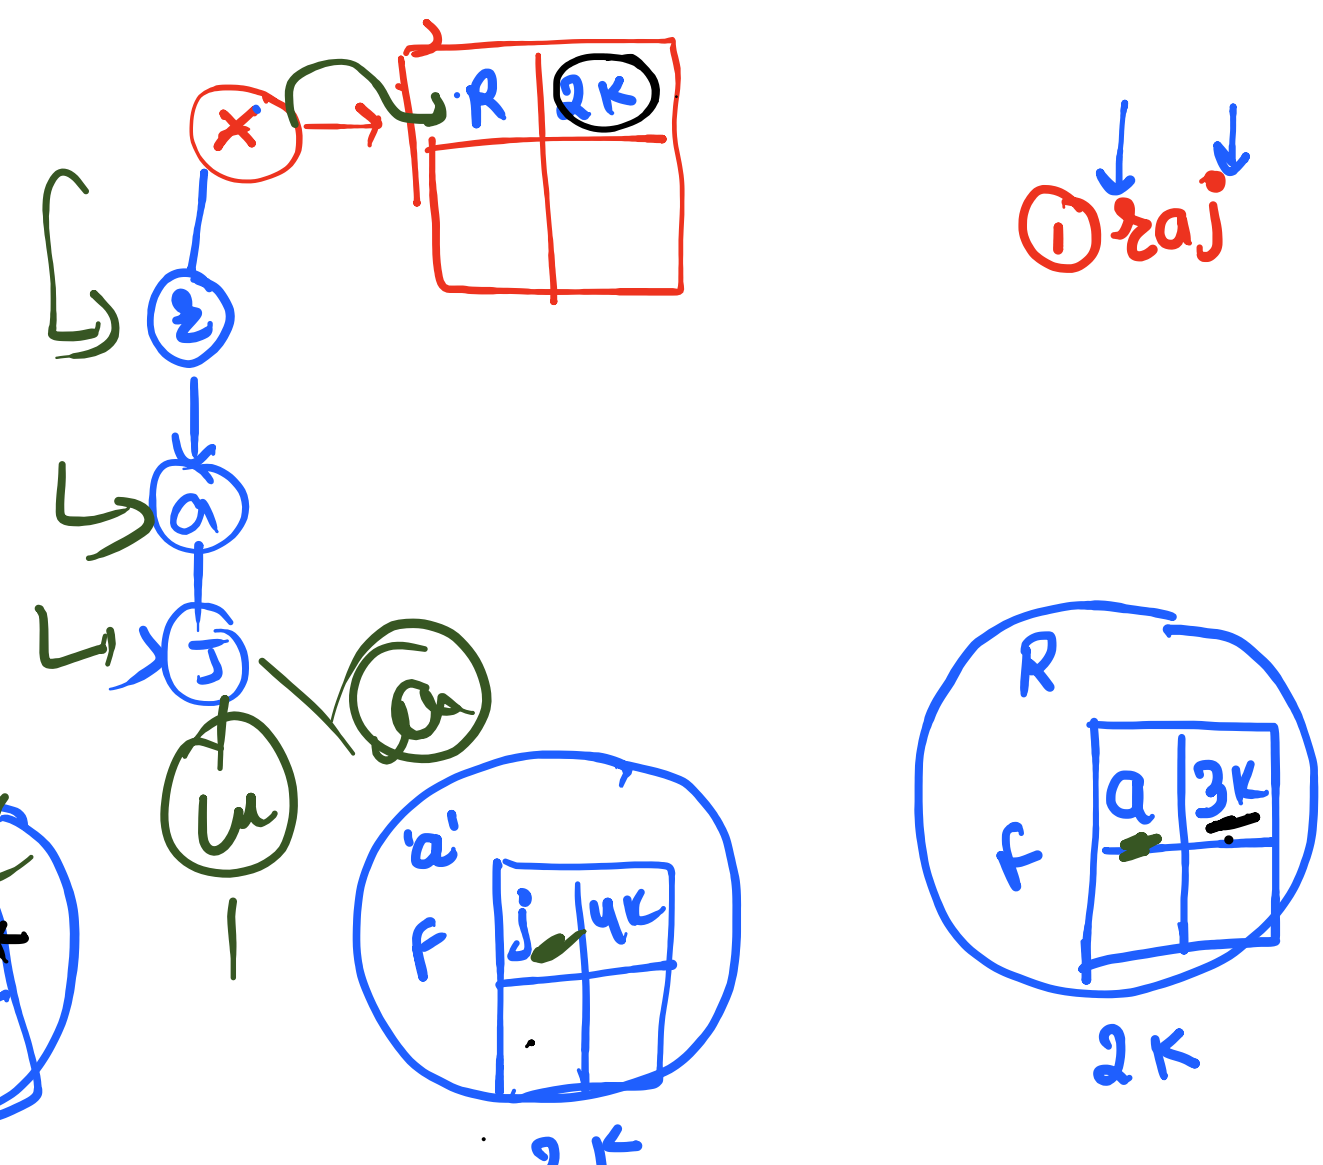

raj

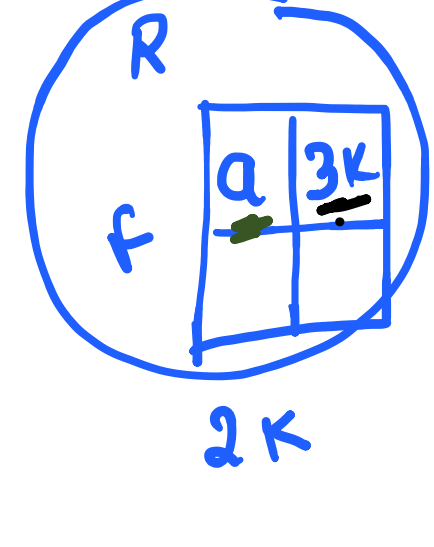

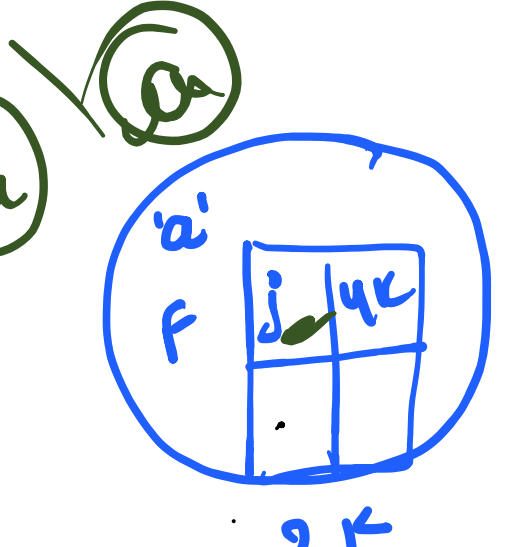

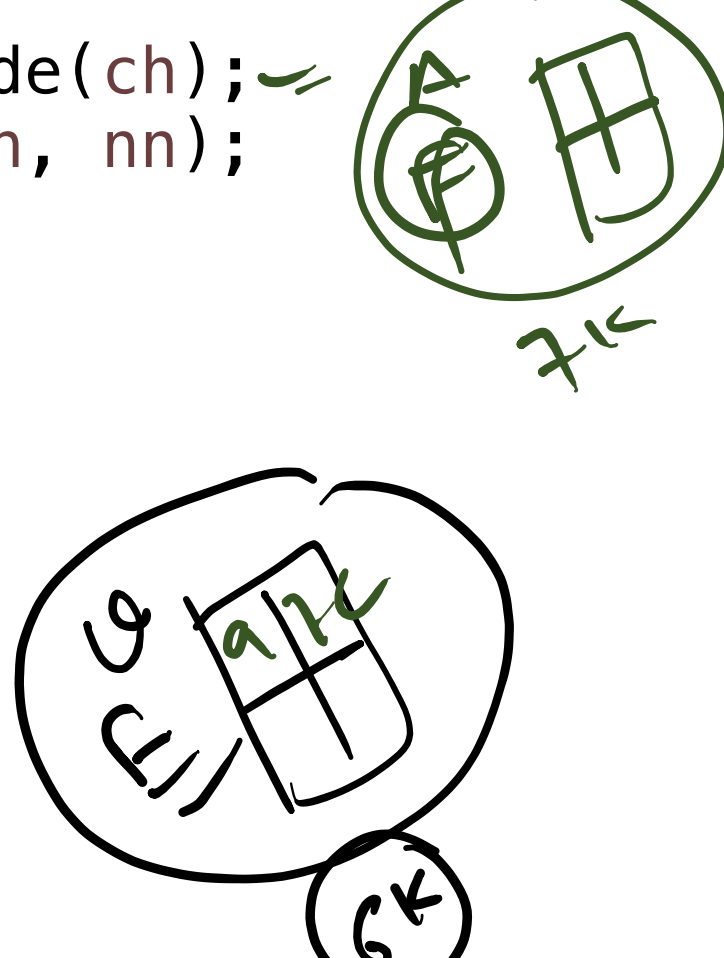

```
public void insert(String word) {  
    Node curr = root;  
    for (int i = 0; i < word.length(); i++) {  
        char ch = word.charAt(i);  
        if (curr.child.containsKey(ch)) {  
            curr = curr.child.get(ch);  
        } else {  
            Node nn = new Node(ch);  
            curr.child.put(ch, nn);  
            curr = nn;  
        }  
    }  
    curr.isTerminal = true;  
}
```

zaiu

curr = curr.child.get(ch)

Sample Input

```
4  
add hack  
add hackerrank  
find hac  
find hak
```

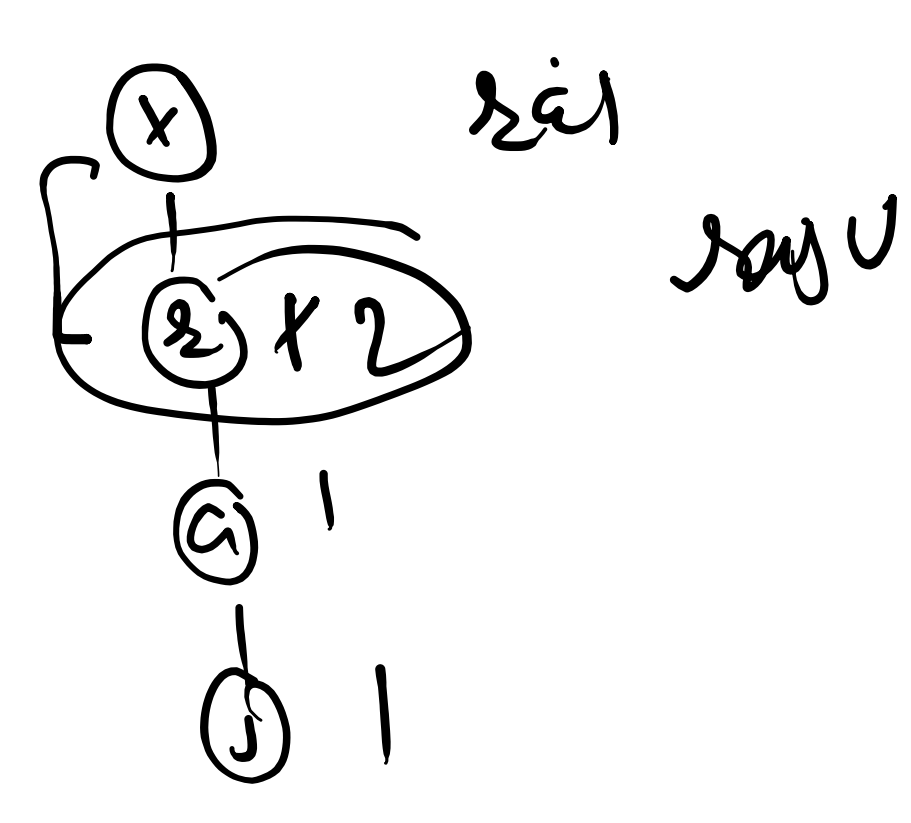

Sample Output

```
2  
0
```

hack

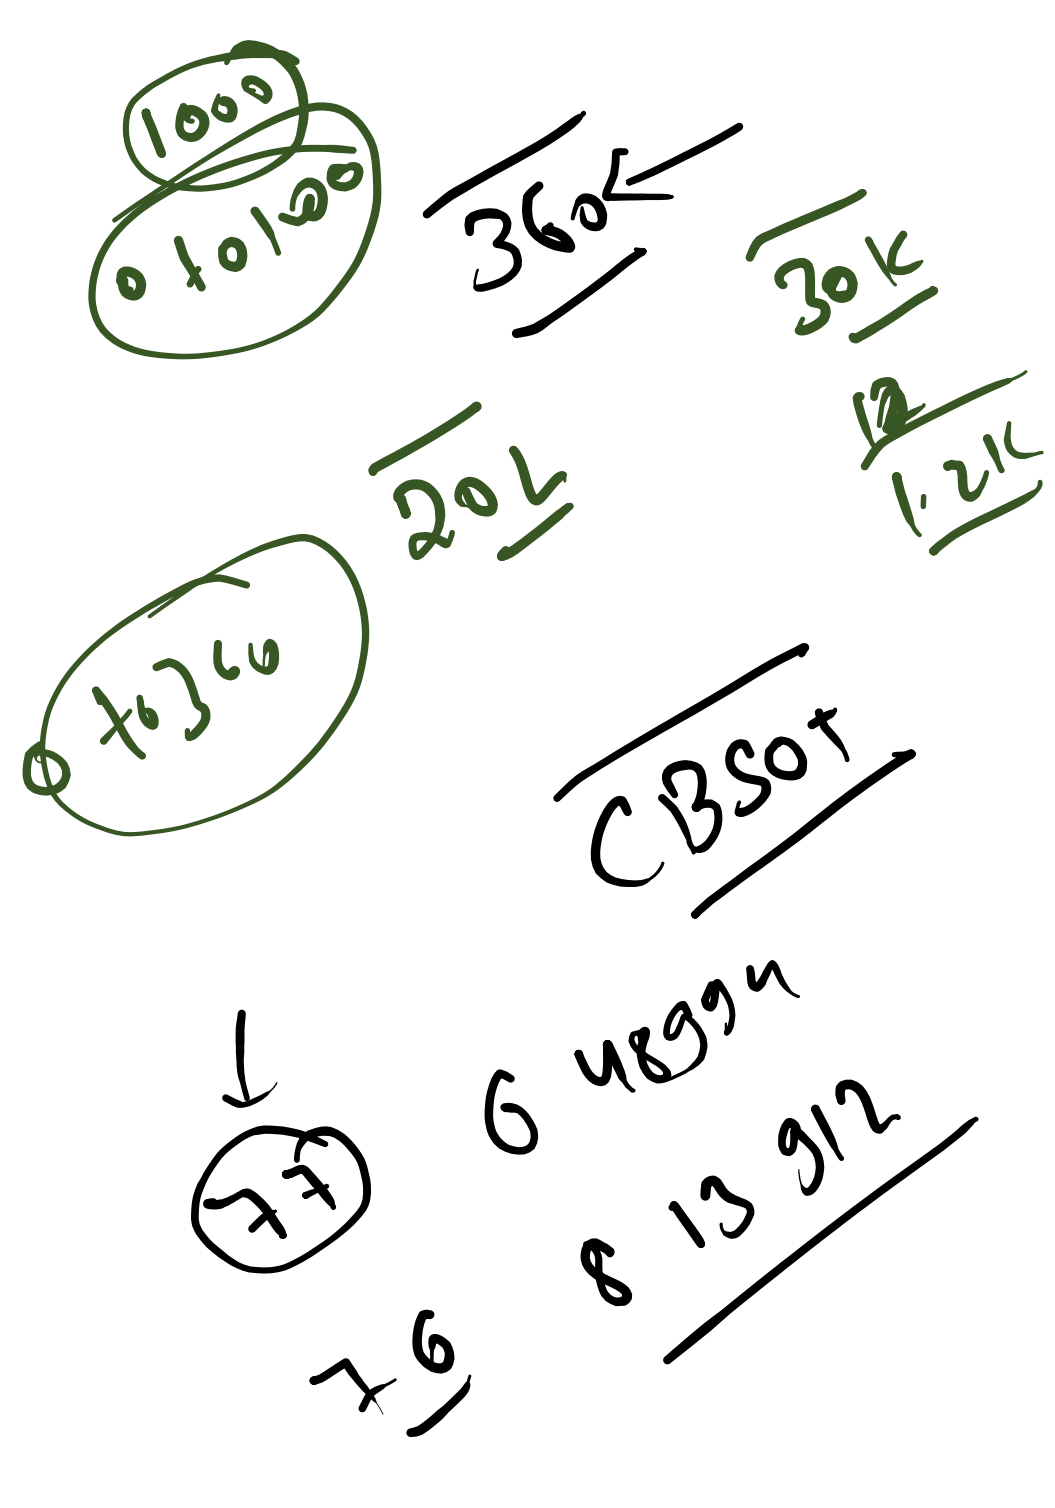

```
public void insert(String word) {  
    Node curr = root;  
    for (int i = 0; i < word.length(); i++) {  
        char ch = word.charAt(i);  
        if (curr.child.containsKey(ch)) {  
            curr = curr.child.get(ch);  
        } else {  
            Node nn = new Node(ch);  
            curr.child.put(ch, nn);  
            curr = nn;  
        }  
    }  
    curr.isTerminal = true;  
}
```
